

WE'RE HIRING!

We are Perun, a spin-off from Technische Universität Darmstadt working on cutting edge technology in the blockchain space. We're currently building our core development team and for our office in Darmstadt, we are looking for a full time developer with a passion for solving complex software challenges who is expected to start immediately.

Our Partners

CORE DEVELOPER

Perun addresses the scalability challenges of current blockchain systems by leveraging 2nd-layer technology. It enables the secure processing of thousands of transactions in real-time, making any blockchain system ready for mass adoption. We are working with our Partners Bosch, Deutsche Telekom and others to develop exciting new use cases for blockchain technology in the IoT and telecommunication sector respectively. Go check out our website for more details.

jobs@perun.network

Your Tasks

- Implement cryptographic blockchain technology
- Contribute to our applied research on blockchain technology
- Help design and implement various cryptographic protocols

Your Skills

- Strong programming skills (Go, Java, C++, Rust or similar programming languages)
- Experience in developing networking stacks
- Experience in collaborative open source projects is a plus
- Knowledge of cryptographic protocols and blockchain technology is a plus
- Experience in agile projects using scrum is a plus

What We Offer

- Be part of an exciting open-source project
- Good engineering practices (testing, CI, reviews etc.), we ❤️ maintainable code
- Employment by TU Darmstadt according to TV-H payscale with possibility to become a founding member of a blockchain startup
- Learn state-of-the-art technology from experienced blockchain researchers and developers
- Flat hierarchies & flexible hours
- Strong contacts to leading figures in the cryptocurrency space
- Lots of fun
